## CORE SKILLS

C# .NET Azure Blazor  
Formio (Low-Code) Angular (v14, v17)  
React / React Native SQL Server Docker  
Kubernetes AWS CI/CD GeneXus  
Oracle Team Leadership

## LANGUAGES

Spanish Native  
English Professional (B2/C1)

## CERTIFICATIONS

Data Science Environment Setup with Jupyter Notebooks and Anaconda  
Professional Python Course  
Python Challenge  
Python: Comprehensions, Lambdas & Error Handling  
Basic Python Course

## EDUCATION

**Ingeniería de Sistemas**  
Universidad Tecnológica Israel · 2015-2017

**Tecnólogo Analista de Sistemas**  
Instituto Cordillera · 2009-2012

**Tecnología de la Información**  
Platzí · 2018

## SUMMARY

Backend-focused Software Engineer with 10+ years building and maintaining production systems in C#/.NET and Azure. Over the past 3 years, expanded into full-stack work with C# Blazor and Angular (v14, with recent exposure to v17), and into low-code development with Formio, building business-facing workflows and forms for companies in Canada and the US. Beyond hands-on development, leads small project teams (3-4 developers) and acts as a technical point of contact for business stakeholders — evaluating feasibility, proposing alternatives, and translating business questions into concrete technical direction. Earlier career experience spans regulated industries (insurance) and public sector systems, as well as fast-moving consulting environments.

## EXPERIENCE

### Senior Software Engineer

Jan 2025 – Present

#### AIM Inc. · Canada (Remote)

- Backend-focused .NET Software Engineer, also building internal frontend features with C# Blazor to extend full-stack ownership beyond the API layer
- Work extensively with Formio (low-code platform) to design and deliver business-facing forms and workflows
- Lead small project teams (3-4 developers), coordinating delivery and technical decisions
- Act as technical point of contact for business stakeholders — evaluating feasibility, proposing solutions, and translating business questions into technical direction

### Senior Dotnet Developer

Jun 2022 – Jan 2025

#### Zemoga · Connecticut, USA (Remote)

- Backend-focused .NET Developer, with growing frontend involvement via C# Blazor
- Worked with Formio (low-code platform) to build and maintain business workflows and forms
- Led small development teams (3-4 people) on delivery, from technical planning to execution
- Partnered directly with business stakeholders to assess feasibility of requests and propose viable technical solutions

### Software Developer

Sep 2018 – Jun 2022

#### nDeveloper Cía. Ltda. · Quito, Ecuador

##### Cars Auction Platform (2018)

- Built backend services with .NET Core (C#) and DynamoDB; implemented CI/CD with CircleCI and Docker
- Developed the Android client using React Native, hosted on AWS

##### Insurance Policy Module (2019)

- Built a core module for a general insurance application using .NET Framework 4.2 (C#), SQL Server, and Angular

##### Insurance Quotation App (2020)

- Developed a quotation platform for a private medical insurance provider using .NET Core (C#) and React
- Deployed via Docker and Kubernetes on Azure, with GitLab CI/CD

### Software Developer

Mar 2015 – Feb 2018

#### Seguros Sucre · Quito, Ecuador

- Maintained and extended a core insurance platform built with GeneXus 15 (generating Java), supplemented with native Java and Docker
- Delivered new features and system maintenance for a business-critical application in a regulated industry
- Integrated services across QBE, MAGAP, and the institution's central system on a related agricultural platform project

### Software Developer

Jan 2012 – Jun 2013

#### IESS · Quito, Ecuador

- Developed reusable modules consuming EJB, web services, and Java-based JARs, integrated with Oracle stored procedures, using GeneXus X Evolution I/II
- Contributed to web design standards and coding best practices for the development team
- Gathered requirements directly from end users and built new systems for national and internal use
- Worked on RedHat environments, configuring JBoss and Tomcat

### Software Developer

May 2009 – Dec 2011

#### Asecsistem · Quito, Ecuador

- Maintained the core system for an insurance provider (Aseguradora del Sur) and developed new applications using GeneXus 8/9/X Evolution I/II
- Worked across CSS, JavaScript, Oracle, and Ajax; managed database backups and stored procedures
